

Where is my Network Model?

When Network Engineering fused Software development

AUTOCON S

THE NETWORK AUTOMATION CONFERENCE

Let's have some context

Who are we?

Writing software
since Big 04

Rugby fan

Curse while
developing

Script kiddie
since 1988

Tech enthusiast

Claude's new bff

We work for Roche

- (Still) Thousands of devices
- (Still) World wide network
- (Still) Heterogeneous and multi vendor ecosystem

What were we doing?

- Model
- Create
- Aim

Dude, where is my Network Model?

Defining the network model

It was humongous

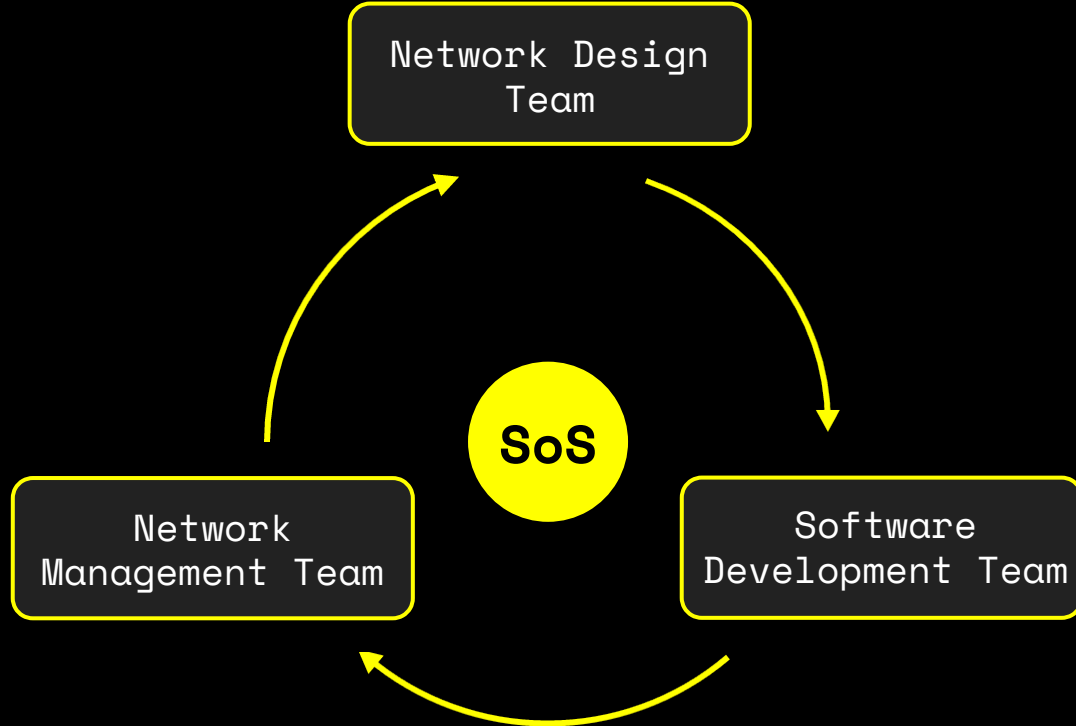

● Best effort

● Project mode

Scrum of Scrums methodology

Scrum of Scrums methodology

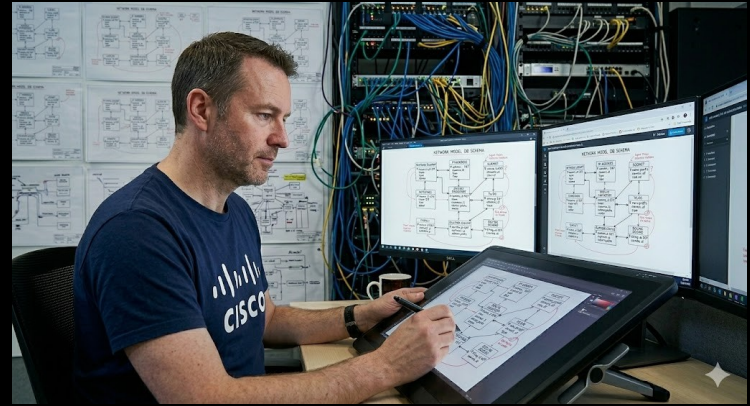

- Do not rush
- Common vocabulary
- Evaluate and improve
- Set realistic goals

Model - Refine - Implement

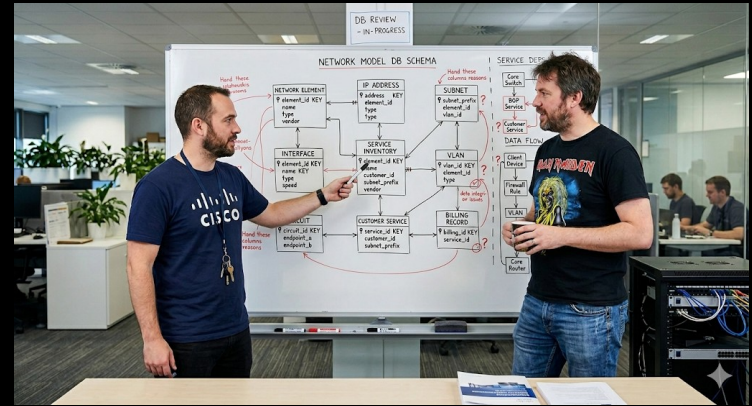

Modelling a piece of the network

- Engineers know networking, not code
- What the network needs
- How to handle the output

Refining that piece

- Hunting requirements
- Finding business rules..
- ...and Look and Feel rules
- User story creation

Implement what is asked

- Developers know code, not network
- Demos are a strong foundation for this methodology
- ...and start again

Conclusions

About the modelling

- Return of Investment
- Unified System of Record
- Open/Closed principle
- Responsibility assignment

About the process

- Let'em shine
- Coordinate
- Common language
- People are coming

Challenges

Challenges

- Model extension
- Hierarchy challenge
- Model Growth
- Data Consumption

Key Takeaways

Takeaways

- Collaboration & communication are key
- Divide & conquer works
- Rely on expertise
- Enjoy the ride

Thank you
